

FINAL DECISION REPORT

AI-Based Child Social Media Addiction Risk Assessment System

1. Case Information

Case ID: CASE-20260102064729

Generated Date & Time: 2026-01-02 06:47:29

AI Model Version: v2.1

Evaluation Mode: Automated Conflict-Aware Decision System

This report represents the final decision generated by integrating independent analysis outputs under an ethical, explainable AI framework.

2. Input Data Sources

The final decision was derived using the following independent reports:

- Report 1 – Media Analysis (Images, Videos, Captions, Hashtags)
- Report 2 – Complaint Analysis (Parent text, Voice-to-text, Behavioural history)

These reports are processed separately to prevent bias and data leakage.

3. Report 1 – Media Analysis Summary

Detected Media Category: Unknown

Observed Indicators:

- Content type detected (gaming / anime / drugs / weapons / fights)
- Exposure duration and frequency
- Behavioural cues (night-time usage, prolonged focus)
- Caption emotion analysis
- Risky online community engagement

Media Risk Score:

Raw Score (0-100):	69
Normalized Score (0-10):	6.9
Risk Level:	Medium

4. Report 2 – Complaint Analysis Summary

Complaint Overview: No specific complaint text available...

Behavioural Indicators Identified:

- Sleep disruption
- School avoidance
- Emotional instability
- Behavioural resistance to device restriction

Historical Complaint Review:

- Previous complaints: None
- Behaviour trend: None

Complaint Risk Score:

Raw Score (0-100):	3
Normalized Score (0-10):	0.3
Risk Level:	Low

5. Risk Score Comparison

Report Source	Raw Score (0-100)	Normalized (0-10)	Risk Level
Media Analysis	69	6.9	Medium
Complaint Analysis	3	0.3	Low

6. Risk Consistency & Conflict Evaluation

Risk Gap = | Media Risk – Complaint Risk |

Calculated Risk Gap: 66

Conflict Classification:

- 0–15 : Consistent
- 16–40 : Partial Inconsistency
- >40 : High Inconsistency

Result: High Inconsistency

7. High-Conflict Risk Resolution Module

(ACTIVATED - Risk Gap > 40)

Conflict Type: Media Risk Underestimation

Unified Risk Score Generation: Suspended

Confidence Level: 40.0%

8. AI Explainable Reasoning Output

System Interpretation:

"A child's social media risk assessment shows a 69/100 Media Risk Score and a Complaint Risk Score of 3/100 Conflict Level: High Inconsistency Conflict Reason: Media Risk Underestimation Explain why a child's social media risk assessment shows a 69/100 Media Risk Score and a Complaint Risk Score of 3/100 Conflict Level: High Inconsistency Conflict Reason: Media Risk Underestimation Explain why a child's social media risk assessment shows a 66/100 Media Risk Score and a Complaint Risk Score of 3/100 Conflict Level: High Inconsistency Conflict Reason: Media Risk Underestimation Explain why a child's social media risk assessment shows a 69/100 Media Risk Score and a Complaint Risk Score of 3/100 Conflict Level: High Inconsistency Conflict Reason: Media Risk Underestimation Explain why a child's social media risk assessment shows a 66/100 Media Risk Score and a Complaint Risk Score of 3/100 Conflict Level: High Inconsistency Conflict Reason: Media Risk Underestimation Explain why a child's social"

9. Final Risk Decision

Final Risk Score: Pending Validation (High Inconsistency Detected)

Overall Risk Category: Uncertain

10. Action Recommendations

Addiction Detected:	Uncertain
Medical Help Required:	Pending
Counselling Recommended:	Yes
Content Removal Required:	Pending
Legal Action Required:	No
Authority Notification:	No
Extended Observation Mode:	Activated

11. Privacy & Ethics Compliance

- Data access restricted to authorized personnel
- Child identity anonymized
- Escalation avoided under uncertainty

12. Final System Note

This decision reflects a cautious, evidence-sensitive approach, ensuring ethical intervention while respecting uncertainty.

Confidence Level: 40.0% | Manual Review: Required
