

# FINAL DECISION REPORT

AI-Based Child Social Media Addiction Risk Assessment System

## 1. Case Information

**Case ID:** CASE-20260303112357

**Generated Date & Time:** 2026-03-03 11:23:57

**AI Model Version:** v2.1

**Evaluation Mode:** Automated Conflict-Aware Decision System

This report represents the final decision generated by integrating independent analysis outputs under an ethical, explainable AI framework.

## 2. Input Data Sources

The final decision was derived using the following independent reports:

- Report 1 – Media Analysis (Images, Videos, Captions, Hashtags)
- Report 2 – Complaint Analysis (Parent text, Voice-to-text, Behavioural history)

These reports are processed separately to prevent bias and data leakage.

## 3. Report 1 – Media Analysis Summary

**Detected Media Category:** Unknown

**Observed Indicators:**

- Content type detected (gaming / anime / drugs / weapons / fights)
- Exposure duration and frequency
- Behavioural cues (night-time usage, prolonged focus)
- Caption emotion analysis
- Risky online community engagement

**Media Risk Score:**

|                                 |        |
|---------------------------------|--------|
| <b>Raw Score (0-100):</b>       | 69     |
| <b>Normalized Score (0-10):</b> | 6.9    |
| <b>Risk Level:</b>              | Medium |

#### 4. Report 2 – Complaint Analysis Summary

**Complaint Overview:** No specific complaint text available...

**Behavioural Indicators Identified:**

- Sleep disruption
- School avoidance
- Emotional instability
- Behavioural resistance to device restriction

**Historical Complaint Review:**

- Previous complaints: 3
- Behaviour trend: Worsening

**Complaint Risk Score:**

|                                 |      |
|---------------------------------|------|
| <b>Raw Score (0-100):</b>       | 78   |
| <b>Normalized Score (0-10):</b> | 7.8  |
| <b>Risk Level:</b>              | High |

#### 5. Risk Score Comparison

| Report Source      | Raw Score (0-100) | Normalized (0-10) | Risk Level |
|--------------------|-------------------|-------------------|------------|
| Media Analysis     | 69                | 6.9               | Medium     |
| Complaint Analysis | 78                | 7.8               | High       |

#### 6. Risk Consistency & Conflict Evaluation

**Risk Gap** = | Media Risk – Complaint Risk |

**Calculated Risk Gap:** 9

**Conflict Classification:**

- 0–15 : Consistent
- 16–40 : Partial Inconsistency
- >40 : High Inconsistency

**Result:** Consistent

## 7. High-Conflict Risk Resolution Module

(Not Activated - Risk Gap  $\leq$  40)

**Unified Risk Score Generation:** Allowed

**Confidence Level:** 100.0%

## 8. AI Explainable Reasoning Output

**System Interpretation:**

"A child's social media risk assessment shows: Media Risk Score: 69/100 Complaint Risk Score: 78/100  
Conflict Level: Consistent Conflict Reason: N/A"

## 9. Final Risk Decision

**Final Risk Score:** 73 / 100 (Normalized: 7.3/10)

**Overall Risk Category:** High

## 10. Action Recommendations

|                                   |           |
|-----------------------------------|-----------|
| <b>Addiction Detected:</b>        | Yes       |
| <b>Medical Help Required:</b>     | Yes       |
| <b>Counselling Recommended:</b>   | Yes       |
| <b>Content Removal Required:</b>  | Yes       |
| <b>Legal Action Required:</b>     | No        |
| <b>Authority Notification:</b>    | No        |
| <b>Extended Observation Mode:</b> | Activated |

## 11. Privacy & Ethics Compliance

- Data access restricted to authorized personnel
- Child identity anonymized
- Escalation avoided under uncertainty

## 12. Final System Note

This decision reflects a cautious, evidence-sensitive approach, ensuring ethical intervention while respecting uncertainty.

Confidence Level: 100.0% | Manual Review: Not Required
